Hour of Day: 0 – 23

1048575	63100	59.9%	11.1
TotalOrders	Unique Customers	Overall Reorder Rate	Avg Days Between Orders

Orders peak between 10 AM and 5 PM, at about 83K–88K per hour

Everyday staples lead: top 10 products reorder 82–88% of the time

Key Insights:

- Orders peak 10 AM–5 PM at 83K–88K per hour; customers return about every 11 days (11.1 on average).
- Staples drive repeat buying: top products reorder 82–88%; produce, dairy eggs and beverages lead on volume and loyalty.
- 25% of customers (21+ orders) place 59% of orders; pantry has high volume but a low reorder rate (about 36%).

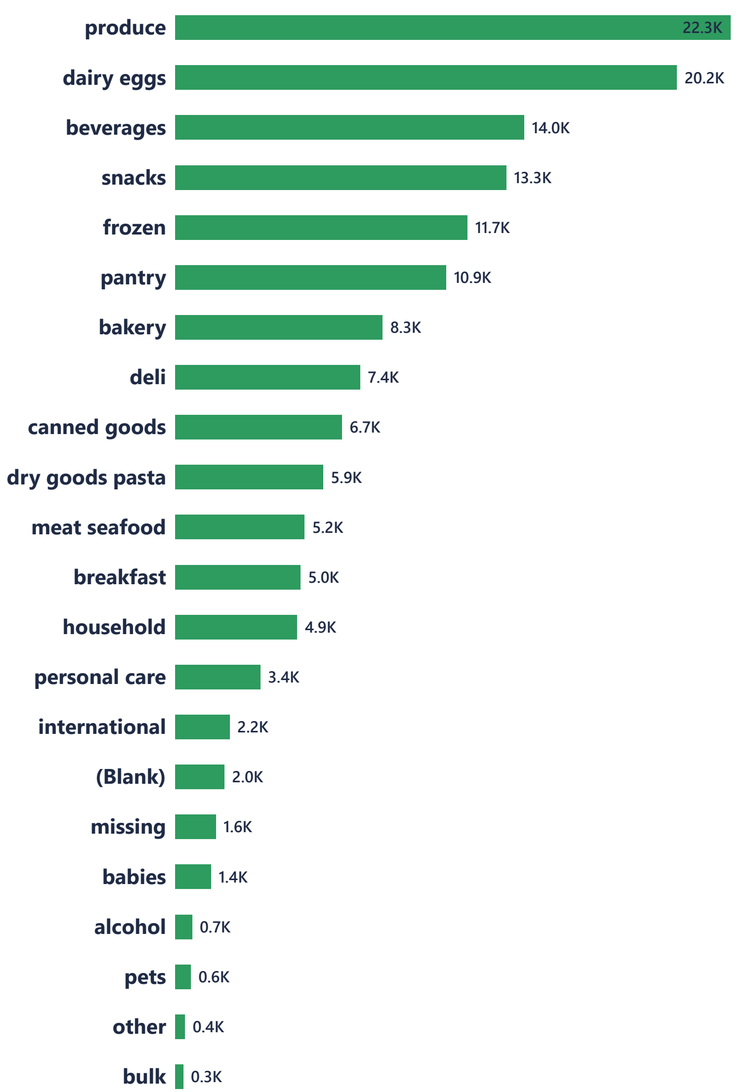

Recommendations:

- Schedule promotions and delivery capacity for 10 AM–5 PM, when demand is highest.
- Send reorder reminders about 11 days after an order, featuring staples such as bananas, milk and avocados.
- Reward customers with 21+ orders with loyalty perks; investigate why pantry buyers don't return.
